Skills

- 3D modelling (low poly, high poly, texturing, rigging, lighting, rendering..)
- utilizing adobe suite, photoshop, after effects, illustrator) to maximize productivity and time saving.
- team collaboration
- Time management to meet deadlines
- eye for details
- Ability to design sets in 3D design with an eye of art director
- ability to render any image or 2d work in a 3D design in a superb match.
- Realistic image rendering

Zakaria Al farran

Digital designer with over 2 years experience especially in 3D designing and animation.

Experience

Patchi

Beirut, Lebanon

July-2014

Currently

Digital designer

I started as a visual merchandiser and now I am a digital designer, I project development department in their architectural project to simulate a 3D project from an AutoCAD drawing. I too work with the creative department to create 3D packaging when needed, and animations brief when requested. I combine adobe suite (after effects, Photoshop, illustrator..) and Autodesk Maya, mud box and fusion 360. For the VM department, I draw the products that needs to be produced in 3D to directly be sent to the machine to be executed. And lately am using Fusion 360, an amazing software that empowers a precise and accurate product drawing.

Education

intstution of industrial and technical studies

Dekwaneh, Lebanon

TS1 graphic desgin

I enrolled in this institure this year, as i changed my major after i fell in love with desgining and animation.

Lebanese university

beirut lebanon

2012

Bachelor of english literature

I enrolled in this major at start, as i was in love with the language and its historical background. later i discovered my passion for 3D designing and animation, so i turned my interest into graphic desgining.
