Summary

I am interested in obtaining an internship/job position in the domain of software development. This position will utilize my skills, develop my strength, and help me reach my maximum potential. I am passionate about software development and technology as a whole, and I am looking forward to jump start my career in tech. In short, I am a fast learner, great planner and organizer, and extremely motivated.

Education

Computer Science - BS

2016 - 2019

American University of Beirut
Bachelor Degree

Experience

- Worked on a group project called CLOASIS in a software engineering course in AUB. CLOASIS is one of the preferred information and communication technology solutions by which the higher education sector seeks to manage and support the learning and teaching experience of students and teachers. It has also become a valuable tool which has the ability to record student information and course learning outcomes for teachers or professors.
- Several blogs created on WordPress.

Skills

Java

Advanced level in java programming. Mainly used in creating complex algorithms to solve difficult problems.

Web-Development

Front-end: HTML - CSS - JS - JQ (Ajax)

Back-end: PHP

WordPress

Database Management

Took a full course in database systems and management which enriched my knowledge about databases as a whole. I have worked on designing and implementation of databases in several projects.

Other skills

Scala, C++, C, C#, PROLOG

Personal Skills

- Fast Learner
- Team Worker
- Communication
- Management
- Organizer
- Planner

Languages

Fluent in English and Arabic
