Objective

Design and develop software using Java and JavaEE. Enhance my abilities in a challenging and growing work environment

EXPERIENCE

Path Solutions, Mkales - *full-stack software developer*

April 2017 - PRESENT
Core banking solutions, providing different aspects of solutions for banking activities.
- *System Administration and Security (SADS) application, responsible for parametrization and setting users access over other banking applications.*
- *Accounting, managing all internal accounting transactions of the bank and between branches.*
- *Web services (SOAP services) for 3rd party applications.*

ICTS, Nabatieh *- software developer*

March 2015 - March 2017
Support in the development of a new software system for various kind of clients. Java SE & EE technologies were used alongside the latest frontend frameworks and libraries such as Bootstrap and JQuery. Focused heavily on building reusable components, applying whenever needed the best practices and development patterns. After the main release of the software.
- Working closely without difficulties with different experiences.
- Working under pressure with delivery dates in mind and constant change requests from the client.
- Learning and applying new frameworks and technologies in a short period of time.
- Exchanging business and technical knowledge with team members, managers, and client.
