📅 1999-12-19

I am a developer who has gathered a big experience in programing and web designing through self-study. At present, I am a dropout Student at university. However, I invest my free and summer time in developing my programming skills. I am passionate about this field of knowledge that fosters logical thinking and creativity. I am working hard to transform this passion into professionalism; thus, I have decided to major in computer science.

As many computer and tech amateurs, my journey into game programming had started with a child's passion towards games. Excited to explore the world of game development, I started to dive into the world of computing. Having access to Internet has enabled me to engage in topics writing in an electronic forum. Exposed to fellows' writings, I became aware of a big industry in computing which is "Web Designing". I have designed many Webs with the latest frameworks. My curiosity has led me into programming. Throughout my exploration and learning experiences, I have learned many programming languages and scripting languages using many frameworks and library and i build manual responsive framework. Currently, I am Developing my web development skills to become a professional FULL STACK Developer and later ML and AI in depth. Besides, I am interested in Photoshop and Blender3D. My ambition carries me to dream of the position of a software engineer. My dreams doesn't stop here; I really want to help other tech amateurs exploring their passion towards programming through free professional training.

### Experience

2013-05 - 2019-12

#### self study

i build many projects for FUN not all of them in my github , programming is my logical game.

### Education

2012-05 - 2018-01

#### High Orient School

- Science general (Math and Physics)

2017-01 - 2017-12

#### Lebaneese University : Institue of technologie

Telecom engineer

got 98/100 in programming course and i pass all my exams , but my passion is to be a Computer Scientist not an Telecom engineer so i drop out.

2018-09 - 2019-05

#### Lebaneese University : Faculty Of Science

Computer Science

got 100/100 in programming course

### Skills

Object Oriented Programming (OOP)

(inheritance , polymorphism , classes ...) used in different languages

HTML / HTML5

advanced

CSS / CSS3 / SASS

Javascript (EcmaScript 5 / 6)

Bootstrap 3

JSON / XML
