WORK EXPERIENCE

Ogero assistant engineer Tripoli, El Mina

25/07/2016–25/08/2016

I was exposed the following topics:

- First the telecom network structure and component including switching technologies, data network, XDSL and role of DSLAM as well as router configuration related to that technology, and the main distribution frame (MD F).
- Second PDH and SDH transport: multiplexing stages, frame structure, application and advantages as well as its bit rates and how it is associated with the microwave transmission. fiber Optic transmission and DWDM technique were also covered.

Port of Tripoli assistant engineer Tripoli, El Mina

25/07/2017–25/09/2017

I was exposed the following topics:

- A training course in administrative, commercial, financial, technical and logistic affairs at the port for eight weeks. I had a very good assessment during the training period.
