Academic Project:

Project Title:

Online Bill Payment System (E-Payment)

Project Details:

We decided to do a project titled “**E-PAYMENT**” about the process **Online Electricity Billing**. Electricity is essential in our daily life. Flow of electrons is called Electronics. Electronics cannot work without electricity. This web application deals with online electricity bill payment. This technique helps senior citizen to avoid stand in Queue. This was very helpful to the people who are employed. People are busy in now a day. Technology has merged itself with the daily life humans. We have seen so much progress in the field of science and technology but we are not able to make full use of it. One such area for improvement is the electricity board billing system. Our existing electricity board billing system in India is obsolete and time consuming. The Online electricity billing system eliminates the need to pay the bills at the Electricity office. The user can also verify if the bill received is the right one or no. we can make use of this technology to such an extent such that even complex problems can be handled in an easier way.

- ❖ **Role** : Team member
- ❖ **Team size** : Three
- ❖ **Duration** : 3 months
