*As a forward-looking millennial, I am driven by a spirit of entrepreneurship and achievement. Through my valuable internships over the past few years, I have come to understand the value of team work as well as the knowledge and experience that reside in the large corporations — the engines of the world economy. My purpose in the next phase on my career path is to grow professionally in a dynamic business position, and to gain the intellectual assets needed to realize my vision of advancement, while solidly contributing to the collective success of the firm I join. It is my hope and intent to build a track record of high accomplishment in a globally oriented business that shares my ideals.*

---
