ABOUT

I am an experienced Software Developer, with the capability to carry on with any given project. I always love to learn new technologies and to enhance my skill set.

PROFESSIONAL EXPERIENCE

Oct.18 – current

Foo. | *Project Tech Lead / Backend Developer* | Beirut

- Providing technical assistant to team members, and proper mentoring so they can enhance their independency in carrying out tasks of any feature solely from scratch.
- Defining the architecture of the new features, and setting the optimal solution to complete the given feature.
- Code Review for the implemented features.
- Working closely with the project managers in the business requirement gathering phase.
- Writing technical and business requirement document, to be used as the main written contract between the client and the business team throughout the feature implementation phase.
- Assessing the new features, and providing the project mangers with the needed estimates and implementation timeline.

Jan.17 – Oct.18

Foo. | *Backend Developer* | Beirut

- Implementing Restful API's to be consumed from mobile and web platforms. (PHP, Laravel / lumen)
- Integrating with third party systems mainly telecom subsystems to retrieve and update user data.
- Integrated with various payment platforms using various integration types (web checkout, card tokenization …) to allow the user to pay online and to enable automatic payments through tokens.
- Used Talend Studio to provide one web service (WSDL) thus creating a middleware (Central Architecture) that integrates with a variety of web services.

July. 16 – Dec.16

Freelancing | Beirut

- Working on an Internet Banking web application (C#, MVC)
- N-tier architecture based project.

Nov.16 – April.16

One World 3D. | Beirut

- Working with the senior developer in revamping a billing web app where I was able to enhance my fluency in .NET mvc5 pattern (c#)
- Completed developing tasks ranging from user interface to building modules from scratch and managing backend server code.

Education

Jun. 15

Lebanese American University (LAU) | Beirut

BS in Computer Science
