OBJECTIVE

As a fresh graduate in Computer and Communication Engineering, my objective is to make use of my skills and establish new ones in order to be productive. In addition, I would like to keep learning to achieve more knowledge and experience in the field.

EDUCATION

Bachelor of Science in Communication Engineer | Lebanese International University

OCTOBER 2016 – SEPTEMBER 2019

Maintained around 3.0 GPA over all semesters.

SKILLS

- Experienced simulating different networking tasks (Routing, IP assignment, switching…).
- Design and create native Android applications using Java.
- Design and create websites using HTML, CSS, JavaScript, Bootstrap, PHP, and SQL databases.
- Open to learning new technologies and going out of comfort zone.
- Discipline and organization in meeting deadlines.

ACTIVITIES

- Attended a training course in Satellite Communication and Fiber Optics at Ogero telecommunications.
- Created and designed two Android applications to take attendance over Wi-Fi in class as a senior project.
- Developed a website for buying and selling phones as a project for the web-programming course.
- Attended an Introduction to Databases workshop, which improved my skills in designing and using databases.

- Attend a training in website development at ALMANSAAH company, which improved my skills in designing a huge website.
