SUMMARY

Industrial Engineer currently working as an SAP consultant. Seeking a job with an emerging firm in logistics engineering to hone my strong analytical, communication, and planning skills. Demonstrated exceptional ability throughout my coursework and project work in statistical methodology application and process optimization and implementation.

WORK EXPERIENCE

Tyconz, June 2019 – Current

Beirut, Lebanon

SAP Material Management Consultant

- Joined Tyconz as a Material Management Consultant for the SAP implementation of Ittihad International Investments' 39 different subsidiaries in Abu Dhabi. The current phase of the project is working on 3 of those subsidiaries.
- Spent the first two weeks shadowing the lead MM consultant on the project. Currently working on configuring the system to the business requirements.

SAP's Young Professional Program, February-May 2019

Beirut, Lebanon

Trainee

- Selected as one of 25 graduates to spend 13 weeks going through a rigorous and thorough training program; the training is focused on both soft and technical skills.
- Became a certified associate SAP Consultant as an SAP Activate Project Manager and Financial Accountant. Verifying that I have advanced business skills and the ability to apply different SAP activate methodologies and tools.

BENTA PHARMA INDUSTRIES, June-August 2017

Beirut, Lebanon

Quality Control Intern

- Revamped the company's approach to replenishing medical inventory by developing an inventory control system that helped institute a robust demand and forecasting management system for batch ordering.
- Analyzed system requirements to develop a forecasting model that helped assess material requirements and triggered automatic ordering on a weekly basis.
