- Planed, coordinated, and implemented network security measures to protect data, Software, and hardware.

Tele Performance
Touch call centre representative

Jun 2013 - Sep 2013

- Handled DII (device illegal importation), WhatsApp, Web & Talk illustration calls.

ACHIEVEMENTS

Senior Project

Feb 2016- Feb 2017

Building a Local Area Network

- Configuring a Full Windows Server 2012 environment, including Primary domain controller and a Backup Domain controller with fault tolerance, Remote desktop redirection with Microsoft load balancing feature.
- Configuring Fedora Linux Firewall through iptables to act as a choke point through a Client/Server connection. This includes accepting only specific packets.
- Managing shares, and policies through Group Policies (GPOs).
- Installing SQL server and allowing users to connect and issue queries through firewall.
- Configuring a RAD authentication mode. Domain users can connect through an Access point.
- Joining a Linux user to a Windows Active Directory and accessing Shared files.

SKILLS

- Network Architecture Implementation (Cisco Routers and switches, Network topologies and infrastructure)
- C++ Programming
- Object Oriented Software Programming
- Bash Shell Scripting
- Linux Firewalls Configuration (IPtables)
- Windows Server 2012 Configuration (DNS, DHCP, and Group policies)
- Microsoft Exchange Server 2010
- VMware (domain controller and firewall)
- Network Troubleshooting
- Microsoft SQL Server Administration (DBadmin, design and SQL query)
- Operating Systems Administration (partitions, Linux file systems ...etc.)
- Ethical Hacking (XSS, SQL injection, proxy chains, Tor...etc.)
- Microsoft Access database administration (Design and creating forms)
- Remote administration and support
