About my Self

I am new graduate from Lebanese University. I hope work for new world and better. I believe soft-skills are as much important as hard-skills, organizations need creative and persuasive employees who can conceive the solutions of tomorrow. And as projects grow increasingly more complex and global in the age of AI, effective collaboration and time- management skills only grow more important. Most importantly for me is the adaptability, I believe that an adaptable mind is an essential tool for navigating today's ever-changing world, as yesterday's solutions won't solve tomorrow's problems.

Internship

1-8-2021	Full Stack Internship Asp.net core back-end with three-layer architecture and jQuery, html bootstrap and jqgrid in front-end with logging system
6-2021	Full stack Internship Spring Back-End Angular Front-End. I learned new technical like dynamic component, debugging.
