- Build applications that communicate with SOAP web services
- create SQL database on SQL Server with complex queries.

Android Developer, ITXI December 2014- 2018

Android developer for airline companies application. Collaborate with UI designers, QA team, and other developers to develop cutting-edge applications.

Tasks and responsibilities

- Conceptualized, designed, developed and deployed mobile applications for airlines customers
- Built apps that communicate with RESTful services
- Ensure applications are properly integrated with Android API's
- Create SQL database structures that integrate with Android applications and web interfaces
- Participate in fast-paced development cycles
- Contribute and participate in new feature/product specifications
- Wrote clean, clear, efficient, well-tested, and maintainable code
- Provide support for trainees, new employees.
- Ability to conduct and finalize applications alone

Worked with technologies like

- Volley, Retrofit2 HTTP Networking libraries
- Android Architecture component (Room, LiveData, ViewModel...)
- SQLITE
- FCM (Firebase Cloud Messaging)
- Fabric Crashlytics, and Firebase crash reporting
- Pushwoosh (Push notification platform)
- AdMob and Facebook Audience Network (Showing ads in apps)
- Google Analytics, Firebase Analytics, Adobe Analytics (monitoring and analyzing traffic on apps)
- JSON (Restful web services)
- GSON (parsing strings)

- Gradle (for continuous builds)
- MVP, MVVM Design pattern
- Android Support Library V7, V4 with materials design principles in mind
- Android Studio

FREELANCE PROJECT

All in One Video Downloader(Android - personal app):

This app allows users to download any video from any social media platforms: Facebook, Twitter, Instagram, TikTok, Vimeo, YouTube, Dailymotion...

uploaded since: 14-04-2019 with 30k+ downloads.

<https://play.google.com/store/apps/details?id=com.agapps.allvideodownloader>

Whatsclone (Android - personal app):

Allow user to open another whatsapp account on their phone, and contact any number on whatsapp without saving the number.

<https://play.google.com/store/apps/details?id=com.agapps.whatsclone>

Status Saver for Whatsapp (Android - personal app):

This app allows users to save WhatsApp status image or video to there local storage.

<https://play.google.com/store/apps/details?id=com.status.saver.merger>

App Share & Backup (Android - personal app):

User can extract the apk file from any installed app and share it with his friends

<https://play.google.com/store/apps/details?id=com.agapps.apkextractor>

LibanShop (Android):

This project is an Android online store. This app allows business people/owners to create their online store to sell their products, and customers to buy.

Play store link: <https://play.google.com/store/apps/details?id=com.libanshop.app>

Website: <https://libanshop.com/>

Wedool (Android):

Service provider app which allows users to post or to request a service (tutor, plumber, car mechanic...).

Website: <http://www.wedool.com>

Ultimate Weather (Android):

Ultimate Weather is a FREE weather app based on material design clean visual with many information, easy to use for staying

always updated with the weather conditions and forecast in many places around the world.

Ultimate Weather uses Open weather map as a data channel, and the live updates are really tiny so that you would not use up your data cap.

Playstore

EDUCATION

Bachelor's degree, Computer Science

2010 € 2014	Studying Computer Science, Islamic University in Lebanon, Faculty of Art and Science, Khaldeh.
2011	Cisco Certified Network Association (CCNA) @ BITS – Beirut.
1995 € 2009	Bacc 2, Economic & Social Science, College Notre Dame des Soeurs Salvatoriennes, Abra.

Professional Project

The Traffic Viewer (Graduation Project):

This project is a website in which a map of Beirut showing the information about the jammed street in the city, allowing the user to decide which route to take and predict the amount of time to reach the destination.

Technologies:

Java EE Project:

- JSF (HTML, XHTML), Managed Bean
- EJB
- JPA
- Java DB (JPQL)
- JavaScript
- CSS
- Google map API 3

Online Camera Shop:

An online store to buy a camera and its accessories with online payment.

Technologies:

Same project in Asp.net, PHP:

- Vb.net / PHP
- HTML
- CSS
- JavaScript
- SQL Server / MySQL (Wamp Server)

Car Showroom System:

A standalone management application for car companies and distributors for computerizing entire system of work, stock management customer information, etc...

Technologies:

- C#
- SQL Server (relation between the table in the database)

Car Insurance System:

A management standalone application for car Insurance companies:

Technologies:

- Vb.net
- Microsoft Access database (table relationships)

SKILLS

Languages: Arabic: Native speaker
English: Good (Spoken - Written - Read)
French: Good (Spoken - Written - Read)

Skills: **Web Application:**
Asp.net, Java EE, JPA, EJB, JSF, JSP, PHP, JavaScript, HTML, CSS, AJAX,
Google map API.

Platform Application:
Vb.net, C#, Java SE, C++, C, OpenGL.

Mobile Application:
Android Application (java, SQLite, xml).

Database:
SQL, T-SQL, JPQL

IT: Computer Maintenance – Configuring Windows Server 2003/2008
Windows – Windows Server 2003/2008 – Microsoft Office 2003/2007/2010
(Microsoft Word, Excel, PPT, Access & Outlook).

Additional: knowledge in Object Oriented Programming
Database modeling, design, writing SQL queries, relations between table.
Good understanding of design patterns, UML Diagrams, and MVC.
Ability to work in a team, dynamic and fast ability to adapt, highly organized and oriented.
Hard worker, innovative problem-solver, self-motivated, good learner.
Willing to try new things and am interested in improving efficiency on assigned tasks.
Working under pressure, working to deadlines, time management.
