EDUCATION

LIU, Beirut/Lebanon   2015 - 2018
B.S. Computer Science

EXPERIENCE

Geek Express, Beirut/Lebanon — *Full Time Project Based*   MAY-OCT 2019
Geek Express is an edu-tech hub for kids and teens offering stem and coding workshops,
subscription boxes and online live coding classes across centers in Lebanon, KSA, UAE and Qatar

SE Factory, Beirut/Lebanon — *Cycle #8 Graduate*   NOV-FEB 2019

Intensive full stack web development program covering cloud architecture, front-and back-end
development, source control, and web application security over 14 weeks of lectures,
workshops and projects

Projects

Online Academy— *Online Live Coding Classes*
Designed the back-end and front-end of an online academy project merging with the original
website, integrated recurring monthly subscription, registration pages, integrated mailing system
for students, customers, instructors, and administration & multiple language option with
adjustable fonts and text location.

EduTrack— *Stay on Track with your Child*
Built an interactive teacher-parent website that allows parents to stay on track with their
children, view their grades, attendances & chat with the teacher. Teachers can send
notifications to parents as well.

Order Processing System—*For Restaurant Customers*
Developed a system that allows customers to search for and order food, pay bills or keep a report
related to the restaurant using an iPad stick available on the restaurant's table.
