SUMMARY

A passionate software developer who loves to take on challenges; I worked on different projects varying from the web to mobile applications. I keep on learning every day as I realize that I have a lot left to learn. I am a perfectionist in Software Development who seeks quality and consistency, with excellent communication skills, a critical thinker, curious and initiative.

TECHNICAL SKILLS

- Web Framework (Angular, React)
- Ionic Framework
- Node.js (with TYPEORM)
- Serverless Framework
- Database (MySQL, Firestore)
- Dialogflow
- Postman
- Swagger
- Source Control (Git)

EXPERIENCE

Scryptech, Beirut – *Software Developer*
June 2018 – PRESENT

- Taslim:
Developed a web application using Angular and Firebase. The application organizes the deliveries for a specific restaurant; it allows a seamless communication between the cashier and the delivery personnel.
- Monica:
 Developed a mobile application using Ionic, Angular and Firebase. The application is a chat bot that organizes meetings and appointments.
- Celitech:
Developed a web application using React, Node.js, TypeORM and MySQL db. The application manages purchasing data packages with E-SIM providers.
- NDIS:
Developed a web application using Angular and Firebase. The application manages participants budgets
