Experience

2016 - PRESENT

Brate – *Front end Developer*

- Set up all the front-end development workflows + trained multiple employees on getting up to speed with it.
- **Website**: Rebuilt an old website into a fully responsive web app that allows users to discover products and businesses close to their location. www.brate.com
- **Custom Backoffice**: Built the back office side for the application where business owners can manage the products and details that appear on the web application.
- **Custom CMS**: Built an internal back office for employees to be able to manage businesses and user accounts.
- **Email Templates**: Created custom email templates to send for users and business owners.
- **Chrome Plugins**: Created a chrome plugin that allows employees to add content directly to our backoffice from any html page.
- **Android App + BarcodeScanner**: Created an android application that allows business owners to scan and upload their product directly online.

Stack: HTML - CSS - SASS/LESS - WEBPACK - JS(ES6+) - REACT - REDUX - ANTD - SVG - FOUNDATION/BOOTSTRAP - JQUERY - CHARTJS - ANDROID(JAVA).

2015-2016

SerVme – *Front end Developer*

- Developed a **Web App** that:
  - Manages reservation and waitlists for venues (restaurants, clubs, bars...)
  - Crunches the entire venue's analytics data from its top clients to the best menu item and top table.... All of them with engaging charts and views.
  - Manages the venue's floor plan (add table, bar, wall, tables size, create a floor plan sample...)
- Helped multiple fresh graduates, and interns get up to speed with the technology stack we were using.
- **Widget**: Developed a widget for all the venue's to put on their website, Facebook page or anywhere they desire so that all the customers can make their reservations through this widget.
- **Custom Backoffice**: Created an Admin website for the company to be able to manage all the venues working with them, add sample floor plans for them, manage their reservations through the admin site.

Stack: HTML - CSS - JS - JQUERY - JQUERY UI - ANGULARJS - BOOTSTRAP - D3 - GOOGLE CHARTS - CANVAS - PHP - SLIM.

2013-2014
Ever Team – *Web Developer*

- Worked as a part of a team building different projects and solutions most of them regarding ECM (Enterprise Content Management) solutions and web application. I developed webpage from the front-end design and script to their back-end management and connection to databases, while having organized (business-data-view) layers for the project.

Stack: C#.NET - SQL SERVER - SHAREPOINT.

2012-2013
ADMIC (BHV) – *Project Unit Developer*

- Worked on managing reports using Microsoft reporting services and delivering the data to the client in organized reports with receiving the design of the report and building it by writing SQL queries on tables and MDX queries on cubes to retrieve the data before organizing them.

Stack: VB.NET- SQL SERVER - SQL CUBES.

Education

2013-2015
Lebanese University – Fanar II – *Masters In Computer Science*

2010-2013
Lebanese University – Fanar II – *Bachelor In Computer Science*

2010
Ecole Saint Georges – Bsalim – *Lebanese baccalaureate Part II in Life Sciences*
