Experience

Full-Stack developer December 2019 - Present

Mirrorm

Mirrorm is a unique mass market tool that detects and identifies brands and logos in posts and stories through AI.

I'm working as Full-stack developer to develop a web Application with React/Redux on the front-end and PHP Yii2 on the back-end

My tasks are 70% on the front-end of the project which allowed me to refine my React/Redux skills while still creating php endpoints/RESTful API

Full-Stack developer January 2019 - December 2019

L-One Systems GmbH - Darmstadt, Germany

Working with the php framework CakePhp and MySQL to develop, repair and maintain a web application called Avalex

Avalex is a service that generates privacy policy in user's websites. their vision is to make privacy policy permanently legally secure in their client's websites, their mission is to make it really easy and comfortable to use.

Notable full sections I worked on with Avalex:

- E-payment.
- Affiliate program.
- Automatic annual recurring payments.
- Admin Control Panel to view/manage Avalex's Invoices.

as well as being the focal point between the Project's owner and the development team and handling the product delivery to the server using Version Control & CI/CD

Experience letter : **L-One Systems GmbH**

Front-end Developer June 2017 - January 2019

TechnoPlus+

Worked with HTML5, CSS3, JavaScript to produce responsive user-friendly websites and web applications

worked with REST API and JSON.

produced a completely adaptable and highly customizable e-commerce business that took the Syrian e-commerce business by storm and was bought by the largest companies businesses in the Syrian market.

Experience letter : **TechnoPlus+**

Soft Skills

- Team player.
- Mentoring skills.
- Work Under Pressure

Full-Stack web developer

April 2017 - May 2018

Kabour International Group

Worked on developing an already-built ERP system for the company
the System's goal was to manage the distributions of products among the merchants and traders, it

widely focuses on products distributions, inventories, invoices and orders but it also had many

minor sections and modules such as (Human resources, machinery and some CRM insights)

I also built the Company's website to feature their products and services

the website is currently under the following link

<http://www.kabourgroupp.com/>

Experience letter : Kabour International Group

Full-Stack web developer

August 2016 - March 2017

SoftCAD ICT Solutions

Worked as a team member that consists of 9 developers and a database administrator,
we were working on an ERP for a metal manufacturing Company called "Hadeed",

My role was to work in the HR module in an ERP system;

I managed the entire HR module and its processes and its various aspects from applications to retirement going through recruitment, training, evaluation, performance, placement, compensation, vacations, work shifts, etc...

My duties included from designing the data structure and database objects (tables, procedures, functions and triggers) i needed, all the way to designing the interface and everything in between (building the API, and styling the interface)
