

# Muhammad Mneimneh

## Personal info

**Date of birth:** 03/01/1995  
**Nationality:** Lebanese  
**Address:** Beirut, Lebanon  
**Phone number:** +96171189994  
**Email address:** mohamadmneimneh.95@gmail.com

## Profile

A highly motivated, creative and detailed mobile software engineer with strong analytical, interpersonal and communication skills, driven to be the best at what I do. I enjoy the project planning process and have a tendency for leadership. I seek knowledge so I can have opportunities to develop and hone my skills, learn from people I can indeed look up to and take on projects that are challenging and have an impact on people's lives.

## Working experience

<b>Integrated Digital Systems (IDS)</b> Beirut Lebanon	<b>Trainee</b>	<b>06/2016 – 05/2017</b>
<b>Evertteam Global Services</b> Beirut/Doha Lebanon/Qatar	<b>Senior Software Engineer</b> <ul style="list-style-type: none"><li>• Learnt the basics of iOS development using Objective C &amp; Swift languages.</li><li>• Supported existing iOS applications.</li><li>• Built a hybrid application for the Qatari Red Crescent from scratch using React Native, the application's main goal is to enable people from around the world to donate for QRC's humanitarian projects.</li><li>• Learnt the process of publishing mobile applications to the iOS and Android stores.</li><li>• Acquired the basics of C# and assisted in supporting the Web API.</li><li>• Visited clients onsite and provided technical support, production deployment &amp; testing and gathered their feedback about the applications.</li><li>• Participated in the business requirement gathering for new projects.</li><li>• Built POC applications.</li><li>• Handled the management of the mobile developers team: planned, estimated and organised tasks.</li><li>• Supervised the implementation of the projects' plan, and made sure the mobility team's deliveries to be on time and of high quality.</li><li>• Participated in projects planning meetings with the Project Managers, business analysts and team leaders in order to provide the estimations for the mobile applications tasks and define its business.</li><li>• Currently, I am the lead developer on an inspection mobile application project for the Ministry of Health in Qatar, my team is developing the application using React Native. The inspection application will mainly be used by food inspectors in Qatar to fill/view/sign reports regarding food quality in restaurants, stores and imported goods to help the Ministry applying its food safety regulations.</li></ul>	<b>06/2017 – present</b>
