FARES J. EID

Summary

I'm a senior .Net Developer/Analyst at Cedarcom Holding with a master's degree in Management Information System at Saint Joseph University in Beirut-Lebanon.

As an ambitious and hard-working individual, I'm always looking to challenge myself.

Experience

1st of September 2017 – Current date: **Cedarcom Holding**

Senior .Net Developer/Analyst

Account Receivable Management

- Front End solution to handle Cedarcom customers' account receivables
 - o Add Collector Activity (Phone Calls, notes and commitments)
 - o Calculate monthly invoices and collections with A/R variation
 - o Integration with company's accounting software
- Month to Month comparison reports
- Front end built using HTML5, CSS3 and AngularJS
- Back end built using MVC4.
- APIs built using rest web APIs, Entity Framework connected to SQL Server

STARZ PLAY

- API integration between STARZ PLAY and all ISPs in Lebanon.
- API integration between STARZ PLAY and Alfa and Touch Telecom.
- Automated processes that will handle mobi bundle users' subscriptions on STARZ PLAY.
- Integration with Crepaway, Careem and McDonald's Lebanon

Data Warehouse

- ETL scripts using Microsoft's SSIS to enable daily processing of data sets into data warehouse.
- Automated and executed operational processes and procedures to ensure performance in a high availability environment.
- Centralized solution that integrates all the routers, with CRM and ERP providing live data to the stakeholders.

Ogero ISP Control

- Web based BackOffice with data level and page level security using the latest technologies
- Integration with the Lebanese Internal Security Forces and the Lebanese Ministry of Finance

Reporting and Dashboards

- Front end portal to the reports and dashboards connected to the data warehouse.
- Dashboards available for internal stakeholders on QLIK BI.
