- Python core programming (Python 3).
- Adobe Photoshop, Dreamweaver, Illustrator and Premiere Pro.
- Java (Swing with MySQL database).
- Hybrid mobile apps (Adobe PhoneGap).
- Linux OS files/folders handling and manipulating.

MAIN PROJECTS

1) www.lebmall.com

The website that I was working on when I was an employee at LebMall, Beirut.
 It is an e-commerce marketplace with a trendy design and many features.

2) www.shoghol.org

A website which I own and manage since December 2016, it is the first job portal in the middle east that collects job vacancies from multiple websites, Facebook groups and WhatsApp groups to classify them then by country/by date. SHOGHOL is very useful for job seekers in the Arab countries since it provides search efficiency and time/effort saving. SHOGHOL is receiving thousands of visitors weekly and from different countries (A Google Analytics screenshot showing the visitors of my website between April and October 2019: <https://sho8ol.com/Analytics.JPG>).

3) www.newlink.me

A very smart and light web tool that I have developed to help Internet users shortcut their long links: easily, for free and without waiting for redirection countdowns.

4) Moreover, I have worked before on two complex systems: covering invoices, receipts, credit notes, debit notes, statement of accounts, user management with multiple roles and permissions in addition to email sending, taxes auto calculator and daily workflow in/out.

One of them was the 1st system in Lebanon that is dedicated for customs transactions (PHP based) and the other one was for a tobacco store (warehouse and retails using Java Swing).

However, it may remain confidential due to customers privacy, I **can't** mention their names here.
