Saida, Lebanon 📍

Dynamic Senior Full-stack Developer and Project Manager with over 6 years of experience leading software projects from conception to completion. Skilled in aligning technical solutions with business objectives and adept at managing cross-functional teams to deliver SaaS and integration projects. Strong analytical and problem-solving abilities, with a focus on delivering data-driven solutions. With additional skills in business analysis and technical project management.

WORK EXPERIENCE

Project Manager
Karim Press

07/2021 - 08/2024   *Saida, Lebanon*
Digital Services Agency

Achievements/Tasks

- Led multiple software development projects across various industries, aligning technical solutions with business strategies.
- Managed cross-functional teams (developers, designers, marketers) to deliver SaaS platforms and custom web applications on time and within budget.
- Acted as a bridge between business stakeholders and technical teams, ensuring clear communication of project goals and technical requirements.
- Implemented Agile project management methodologies (Scrum, Kanban) to streamline project workflows and improve team efficiency.
- Oversaw software integration projects involving cloud platforms, data modeling, and system architecture, leading to a 20% increase in operational efficiency for clients.
- Utilized Jira and Azure DevOps to track project progress, manage resources, and resolve issues in real-time.
- Conducted business analysis and translated complex business needs into actionable technical plans, enhancing collaboration between business and IT.

Project Manager & Technical Business Analyst
Freelance Projects

06/2018 - Present   *Remotely*

Achievements/Tasks

- Managed end-to-end software projects for small and medium-sized businesses, focusing on aligning technical capabilities with business objectives.

- Risk Assessment & Problem-Solving

WORK EXPERIENCE

Software Developer
Cadmus Data Science

12/2018 - 11/2020,

Achievements/Tasks

- Acquired hands-on experience in mobile app development, working with web services, third-party libraries, and APIs.
- Gained exposure to automated workflows, enhancing development efficiency.
- Expanded expertise in DevOps practices and managing SQL Server databases.
- Developed proficiency in handling remote data using RESTful APIs and JSON, along with designing Android UIs based on best practices and modern design principles.
- Strengthened understanding of mobile app architecture, industry trends, and emerging technologies.
- Enhanced Python programming skills through practical application in various projects.

SOME OF THE FREELANCE PROJECTS

Bocabilla (SaaS Platform)
- Technologies: Laravel, MySQL
- Developed Bocabilla, a cloud-based management platform designed for small businesses and freelancers, providing tools for project tracking, invoicing, and client management.
- Integrated a secure user authentication system using Laravel's built-in Passport for API security, enabling multi-tenant architecture for multiple businesses.
- Implemented real-time notifications and payment processing using Hyperpay, ensuring seamless subscription management.

Oureasygame (Mobile App)
- Technologies: Flutter (Front-end), Laravel (Back-end), MySQL
- Developed a mobile app, Oureasygame, aimed at students seeking help with college courses and tutors available to accept requests based on their expertise.
- Built the front-end using Flutter for cross-platform mobile development, ensuring smooth performance on both iOS and Android.
- Leveraged Laravel for the back-end to manage user authentication, request handling, and payment processing.
- Integrated push notifications, in-app messaging, and real-time bidding systems for tutors.

Cookabox (Web App)
- Technologies: Next.js, Node.js
- Created Cookabox, an ingredients delivery web app allowing users to subscribe to monthly packages based on recipes they want to cook.
- Developed a dynamic subscription model using Next.js for a fast, SEO-friendly front-end, and Node.js to manage server-side rendering and subscription plan management.
- Integrated payment gateways and automated email notifications for billing and shipping updates.
- Optimized the user interface for responsive design across devices to enhance user experience.

POS & E-commerce Integration System
- Technologies: Laravel, React.js, MySQL
- Built a custom POS system fully integrated with an e-commerce website to streamline order processing and inventory management.
- Developed robust reporting features, real-time inventory tracking, and multi-location management within the POS system.
- Enabled sync between in-store and online sales data.
- Used React.js for building an interactive and responsive front-end.
