Beirut - Lebanon

## PROFILE

My commitment to software is not only well-written, highly documented code using the latest technologies, it is to solve the problems of our clients in the best way possible. I believe that software development process is about openness, transparency and vision, our moral code is share as much knowledge as possible, which not only makes the process smooth but also a joy.

## EXPERIENCE

*August 2017 – present*      **KHOOLOOD s.a.l – BEIRUT**  
Senior Web Developer/Chief Technology Officer

- Coordinated deployment of new features like NodeJS for push notifications and ensured quality through beta link testing.
- Integrated applications by designing database architecture and server scripting as well as studying and establishing connectivity with network systems, search engines and information servers.
- Defined web app objectives and significantly improved UI/UX by analyzing user requirements and envisioning system features and functionality.
- Designed and developed user interfaces for web applications by setting expectations and features priorities throughout development life cycle (design methodology, tools set, programming languages, QA/testing).
- Collaborated with third party to create and maintain robust framework to support apps/websites.

*2013 – July 2017*      **NOBRAND s.a.r.l – BEIRUT**  
Project Manager

- Was responsible for quality of applications delivered for customer orders.
- Set up primary meetings with clients to discuss their greater business and personal needs to develop and propose advanced solutions.
- Reviewed work progress on ongoing basis, generated status reports, provided clients with periodic updates and discussed ways to optimize project operations with timely delivery.
- Managed teams from 3 to 7 employees from designers to developers, handled all development tasks.
- Ensured team members stayed on task and assigned coding tasks to various team members.
- Developed with the team on daily basis, and lead the development and helped the team with their daily technical challenges

2009 – 2013      NOBRAND s.a.r.l – BEIRUT

Senior Web Developer

- Maintained and upgraded legacy software and systems within the company through introduction of new technologies.
- Developed in-house backend system and simplified integration with dynamic websites.
- Established communication with clients to procure their requirements, converted functional needs into technical specifications and planned user-friendly websites/portals accordingly.
- Integrated distinctive web components to facilitate various functionalities on client websites and help them engage with business users in an efficient manner.
- Planned and conducted site-testing exercises, identified problem areas and initiated necessary corrective measures to fix bugs/errors.
- Conceptualized, designed and programmed components, plug-ins, submodules and specialized interfaces using technologies like PHP, MySQL, CSS and HTML.
- Ascertained compliance with industry best onsite SEO practices and W3C standards to ensure cross-browser, cross-platform compatibility.
- Provided consultancy with regard to restructuring of websites/portals and assisted clients in converting static websites to dynamic sites.
