Skilled in directing development with creative and performance-oriented approach. Proud team player focused on achieving project objectives with speed and accuracy.

WORK EXPERIENCE

Software Engineer
Matic Services

07/2018 – Present   *Beirut, Lebanon*

MATIC is a SaaS (software as a service) enabled marketplace connecting users to highly qualified registered cleaners. Founded in Dubai in 2016, it has now extended across the Middle East and operates in twelve key cities in four major countries which are UAE, KSA, Bahrain, and Lebanon.

Achievements/Tasks

- Drove continual improvement to system architecture by refactoring old legacy code.
- Wrote server-side and client-side code for Matic Services and Ionoview projects using PHP, HTML, CSS and JavaScript, specifically with Yii and Symfony frameworks.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Migrating the software from MVC to Restful Apis.
- Conducted unit testing to deliver optimal browser functionality.
- Authored code fixes and enhancements for inclusion in future code releases and patches.
- Introduced methodologies and best practices to software development division to enhance product definition and application customization.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Worked closely with Project Managers and other developers to define parameters and plan detailed specifications with clear project deliverables and timelines to meet strict deadlines.
- Carefully documented technical workflows and knowledge in private wiki for education of newly hired employees.

Full Stack Developer
SE Factory

10/2017 – 01/2018   *Beirut, Lebanon*
