PROJECTS

Syllabus Builder –senior project

Programming languages: php,javascript.

Framework:Laravel.

Tools:MySQL,phpmyadmin,Tinymce,Bootstrap,vscode.

Syllabi builder is a web application developed for end users: instructors, teachers, guests and university students. The primary goal of the application is to let instructors be able to build a unified syllabus in the faculty to facilitate any process and make it easier and more efficient. Our aim is to make an alternative application rather than a traditional process and we sought to abide by the traditional rules, such as communication and hierarchy between instructors and supervisors as we committed to develop technical features to help them.
