EXPERIENCE

Ubanquity, Lebanon — *Front end Developer*

May 2017 - November 2019

Worked on developing banking mobile applications. I worked on developing native android mobile applications and used frameworks like Android NDK for integrating C++ in android. Also worked on developing cross platform applications using flutter. I also worked on writing flutter integration and unit tests.

Ubanquity, Lebanon — Backend Developer

December 2019 - Now

Worked on developing and deploying backend applications written in Python(Flask Framework) and Golang. Also worked with microservices and used Docker for deploying and integrating with our services. Used PostgreSQL as the database

EDUCATION

American University of Beirut, Beirut — *BE in Computer & Communication Engineering*

September 2013 - May 2017

Coursework included Software engineering and networking

Final Project: Internet of things(smart cane for the visually impaired)

PROJECTS

Bookies, Personal Application — *Full Stack developer*

January 2019 - PRESENT

Google play:
https://play.google.com/store/apps/details?id=com.sanafir.bookies&hl=en

Apple Store:
https://apps.apple.com/us/app/bookiesapp/id1451691306?ls=1

Worked on this application as a personal application. Developed the full backend of this app using Django using the Django rest framework plugin and hosted this application on AWS EC2. Used postgres as my database. Created an Android and iOS application using flutter, and added the app on the Google play store and Apple store.

Programming Languages

Java: I used to write android applications using Java

Dart: Used dart to write flutter applications

Python: Worked on backend applications(Django and Flask), also played with some AI projects

SQL: I am confident using the SQL language

Tools

Docker: I used docker for deploying microservices

Git: All projects done are shared with my team on git

LANGUAGES

Arabic(Native proficiency)

English(Full professional proficiency)

French(Elementary proficiency)
