RE: Android Developer, Oct 07, 2020

Dear recruiting team at RAY, Dear Mr. Joseph Saliba,

I hope this finds you well. I hereby apply for the position of Android Developer at RAY.

I'm a software engineer with 6 years of experience in the mobile apps industry mainly in Android. I went through many experiences from freelance work and working on a job to the management and founding a startup. I'm keen to use my knowledge to serve the community.

I now seek a new challenge being at a startup like yours, working on the exciting novel SaaS platform like the ones RAY is building.

I am thrilled at the prospect of bringing my talents to RAY. Please contact me at your earliest convenience to further discuss how my work history and personality fit the Android Developer role.

Kind regards, Sana Ramadan

## WORK EXPERIENCE

### Tdallal Startup - Co-founder, CTO

09/2019 - 06/2020, Erbil, Iraq - Remotely

A shopping and delivery service that connects people within a nearby geographical area by using eco-friendly bicycles. URL: <http://tdallal.com/>

- Develop the product and service section in the business plan.
- Plan to develop two mobile apps; 1- customer, 2- shopping & delivery man, using Kotlin for Android, and Swift for iOS, including Google Maps, and SMS for verifying user's number.
- Train to implement serverless for backend and real-time chat between users using AWS Amplify, DynamoDB, GraphQL, Lambda, Cognito.
- Design prototype for apps using Adobe XD considering user experience.

### KibarSoft - Technical Manager

06/2018 - 05/2019, Istanbul, Turkey - Remotely

Provides custom mobile apps and websites development services for clients based in the US, Saudi Arabia, Qatar, Turkey. **100% remote work.**

- Lead the team with the agile software development methodology (scrum) using Jira.
- Conduct interviews, hire and train new technical staff.
- Contribute to product design and establishment of requirements.
- Review the work produced by the development team.
- **Türk İndirim - Turkey:** Offers a discount card on products and services. The user can issue a card and read out the offers list.
- **Sharaka - Qatar:** Broker between goods suppliers and restaurant owners. In the app, suppliers manage, post offers and receive requests from restaurants.
- WordPress 4.9-5.0 (WooCommerce - CMS - REST API), Android 8.0-9.0 (java 8), iOS 11-12 (Swift 3-4), MVP, Git by Bitbucket as admin.

Contact: Ammar Sarsar - [ammar@kibarsoft.com](mailto:ammar@kibarsoft.com)

### KibarSoft - Senior Android Developer

04/2017 - 05/2018, Istanbul, Turkey - Remotely

- Design wireframes using Adobe XD compatible with Material Design
- Build and maintain reusable, and reliable code using MVC and design patterns.
- Publish applications on Play Store.
- **Karazah - the US:** YouTube channel addressed to kids. The app displays its videos via YouTube API and YouTube video player.
- **Sima Tech - Turkey:** Supports schools' curriculum via robotics. The app helps students learn how to assemble a robot by displaying images and text.
- Java, Realm DB, RESTful API, Google Maps, Google Analytics, YouTube API, Firebase Cloud Messaging, Fabric Crashlytics, AdMob.

### Android Developer as Freelancer

08/2014 - 03/2017, Damascus, Syria

- Develop 11 apps for clients based in Turkey, Saudi Arabia, and Syria.
- **4Ummah Inshad - Turkey:** Music streaming app. User streams or downloads songs filtering them by artist, album, and producer.
- Android media player => v4 media-compat library, foreground service, offline storage, deep link, ASP.NET C# and VPS hosting => WordPress and BlueOcean for mp3 hosting.
