SUMMARY

A passionate software developer who loves to take on challenges; I worked on different projects varying from web to mobile applications. My curiosity pushes me to learn new things every day. I am a perfectionist in Software Development who seeks quality and consistency, with excellent communication skills, a critical thinker, and initiative.

TECHNICAL SKILLS

- Web Framework (Angular, React)
- Ionic Framework
- Node.js (with TYPEORM)
- Serverless Framework
- Database (MySQL, Firestore)
- Dialogflow
- Postman
- Swagger
- Source Control (Git)

EXPERIENCE

Scryptech, Beirut – *Software Developer*

June 2018 – Present

As a software developer, my role is to support a talented team of developers in building new exciting applications for unique customers. This included attending meetings since projects inceptions, contributing to the software design, supporting the team lead in writing the backlog of tasks, creating new features, testing and deployment.

I earned a lot of experience at Scryptech by challenging myself, I went outside my comfort zone and took responsibility in working on new technologies like Unity and Angular.

Some of the projects that I have contributed to at Scryptech:

- **Tasslim:**
  An application built using Angular and Firebase, it's responsible for organizing the deliveries for a specific restaurant; it allows a seamless communication between the operator and the delivery personnel.

- **Monica**:
  A chat bot developed using Ionic, Angular and Firebase. It's responsible for organizing meetings and appointments.

- **Celitech**:
  A Web application built using React, Node.js, TypeORM and MySQL. It manages purchasing data packages with E-SIM providers. I worked on both the Frontend and Backend.

- **NDIS**:
  A Web application built using Angular and Firebase. It manages social services for the elderly. The system contains different modules for all aspects of such business, ranging from schedule visits, to managing finances and budget, to managing staff certificates.
