## UNIVERSITY PROJECTS

### STUDENT MANAGEMENT SYSTEM

*Java*

This system saves the time of the student, It includes process like registration of the student's details, assigning the department based on their course and maintenance of the record.

### 25/10 CROWDSOURCING

*PHP(Laravel)*

The main goal of this project is to receive feedback from ideas by votes and comments in order to know which ideas are the best and then users will choose the topic they are interested in.

### COURSE DISTRIBUTION SYSTEM

*ASP.NET CORE MVC*

Course distribution, which was created to replace current system used by the Lebanese University.
