PROJECTS

College Application — Use today, and achieve tomorrow

A hybrid mobile application to help professors and students connect, and to answer students' needs. Implemented using:

- REST APIs, Express.js, React-Native, MongoDB, and Firebase
- JWT was used for authentication
- QR Code scanning for ultimate performance

Recycled — Recycle... Everybody's Doing it

A hybrid mobile application connecting recycling companies and citizens for higher efficiency. Implemented using:

- REST APIs, Express.js, Flutter, and MongoDB
- Google Maps API for navigation

Crowdsourcing — Find The Unexpected

A website to help find unexpected solutions, unlock a greater diversity of ideas to improve thinking, and solve tough problems. Implemented using:

- Laravel, Vue.js, and MySQL
- Pusher for live notification

PROFILE

My motive in life is to aim high and reach my goals. I'm a fresh graduate who's developing his mobile and full-stack web development skills. I'm always pursuing opportunities to nurture my skills, learn new technologies, and adapt to the changing and challenging world.
