## Objective:

I am a fresh graduate student seeking for an internship in computer and communication engineering position, I'm applying for this internship aiming to enhance my knowledge, experience, skills and capabilities, so this will make me a part of the company's success story in the future.

## Education:

- **Bachelor's degree in Computer and communication engineering CCE at the Islamic University of Lebanon -IUL- in 2020.**
- Got the Terminal Degree, at AitaAlcha'ab public High School, with an average of 11/20, in 2015.

## Experience:

- Graduated performing a project of **Fire-Fighting Semi-Autonomous Robot** controlled by using Raspberry pi processor.
- Two months online training period in web developer using Python, Html and Flask server.
- Two months training period in **Global Integrated Solution Company** GIS, with web developer specialists (ASP.Net and visual basic), during the fourth academic year.
- I perform a project about **Building Management System** (Java application) through the summer training course (3<sup>rd</sup> year) at IUL.
- I perform a project about **Property Management System** (web application using ASP.Net and C#) during internet programming course at IUL.
- Create a device that detects an object speed (**Speed Detector**) using microcontroller through the mini project course at IUL.

## Qualifications and skills:

Completely responsible for doing my work perfectly and accurately, excellent in team work and work organization, able to meet strict deadlines, working under pressure and having a good base in English language.
