ENGINEERING PROJECTS

Fullstack NGO Mobile Application

Android mobile application for an NGO called “tadamon”, which centralizes all crises happening around Lebanon. The application included a handcrafted modern UI, a full cloud database and seamless navigation.

COVID-19 App Tracker ‘CovidTracker’

Application that notifies your exposure to COVID-19 based on where you have been and who you’ve been in contact with, without any user input, and all in the background.

Coffeeshop Inventory Application

Full stack software that tracks the inventory of a certain coffeeshop, creates invoices and manages orders, all within one single application built in on a tablet.
