Project & product management at the intersection of technology & education.

## EXPERIENCE

### **Oneclick** - *Project Manager (remote)*

May 2020 - Present (contract ends in March 2021) | [oneclick.es](https://oneclick.es)

Oneclick is an education technology (ed-tech) software company based out of Spain, providing digital solutions to K-12 publishers worldwide.

I joined Oneclick to manage a project subcontracted by Pearson Middle East, for a governmental end client in the Gulf region. The project entailed the digitization of the learning experience in an interactive format of curriculum X, as well as the transformation of said curriculum into a digitally compatible format through instructional design.

I'm in charge of setting up the operational processes, managing & training teams of 25+ people, coordinating with the technical team and aligning on product prioritization as well as liaising/delivering with/to the client.
