Employment History

Web Development at Greynab
(November 2021–Present)

- Worked as a full-stack web developer using several technologies like React.js,Next.js,mysql and Laravel PHP.
- Projects I worked on: https://kun-investment-holding.vercel.app/ https://business-code.vercel.app/ https://businesscode-admin.vercel.app/login Specialized Medical Care Center (biners.dev) MEAG – Middle East Airlines Ground Handling (biners.dev) Al Zewayed Holding (biners.dev).

Web Development at Angry Monkey Agency
(June 2021–October 2021)

- Worked as a web developer using multiple technologies: C#, ASP .Net Core, HTML,CSS & LESS, JavaScript & TypeScript & jQuery, Blazor.
- Worked on DateTimePicker, an Open Source Blazor project,GitHub URL: CloudComponents/Components at main · angrymonkeycloud/CloudComponents (github.com) , a demo of the DateTimePicker component can be found at the following URL: Blazor Video Player Component (angrymonkeycloud.com)
- Minor update on already finished websites, example: when selecting a subscription type in the form, an AJAX call will allow the display of additional information at the bottom of the form, URL: The Health Bar Select Get Fit (1100-1300 KCAL) Items (thehealthbarme.com)

Final Year Project

(January-Mai 2020 at Murex Beirut) Calculation of encrypted data stored onto the cloud

- Murex is a company that wants to calculate and store a list of KPIs on the cloud in an encrypted manner.
- Compared multiple homomorphic schemes and then implemented a new one using Talend Open Studio to calculate the required KPIs.
