## EDUCATION

---

### Université Saint-Joseph Beirut, Lebanon

*Computer and Communication Engineering* Anticipated: 2022

- Started in 2017
- USJ Robotics Club Treasurer

## RELEVANT EXPERIENCE

---

### Castalise Beirut, Lebanon

Full-Stack Developer Intern June 2021 – September 2021

- Worked in an agile team following the scrum methodology to deliver new features. During this 3 months, I worked on the registration process for users and organizations, implemented a chat application, and developed other features while keeping in mind the user experience.
- Technology used: MySQL, Node js, AdonisJs, Typescript, JavaScript, Socket.io, Edge.

### Bank Crédit Libanais Beirut, Lebanon

IT Intern July 2019 – August 2019

## SIDE PROJECTS

---

### Sehranin Beirut, Lebanon

Backend developer February 2021 - May 2021

- In a team of 2, created a website that help you find parties depending on the filters you choose. The user can also post a party by creating an account and logging in.
- Technology used: MongoDB, Express, Node js, React, Bootstrap.
- Worked on the backend, created the different entities for users and parties, as well as the routers to access the different endpoint for GET, POST, PUT and DELETE requests, persisted the information in the databases, and implemented JWT authentication.

### MERN Full Stack Address Book Beirut, Lebanon

Full Stack developer March 2021

- Created an address book that list organizations and people and allow the user to see the names and contact details of people in organizations.
- Technology used: MongoDB, Express, Node js, React, Bootstrap.

### Discover Lebanon Beirut, Lebanon

Full Stack developer November 2020 – December 2020

- In a team of 3, created a website that display touristic and entertainment places in Lebanon.
- The client has also the possibility to book a tour with a guide in a region of his choice.
- Technology used: PostgreSQL, Java Spring, React, Material UI.
- Worked on the frontend part, the contact us and about us page, using React and Material UI, and created some entity and endpoint using Java Spring in the backend.
