PROJECTS

Read and Act
A Full-Stack Web App Project

04/2021 - 06/2021   *Solo Freelance*

"Read and Act" is an online social bookstore that encourages people to buy and donate books to support social and charitable initiatives.

Tasks

- Build the Project with MEAN Stack (Angular, Node.js, Express, Mongoose ODM, and MongoDB).
- Write the Solution in five layers: User Interface, Web API, Business Logic, Data Access Layer, and Database.
- Accomplish the Project by depending on Microservices Architecture to host all services on the internet for free. (for example, main API service).
