PROJECTS

CONWAVE — A mobile app that connects students with tutors

Designed a mobile application that facilitates the connection between students and tutors. It allows students to book online or live sessions depending on their needs.

- Frontend: React-Native
- Backend: Laravel, MySQL, and Firebase

E-Commerce — Web Application

A complete and full project for ecommerce dashboard. Implemented using React Js, Bootstrap for the frontend and Laravel, MySQL for the backend.

Recipe Book — Web Application

A very reactive recipe book and shopping list web application with a great user experience. Implemented using Angular, Bootstrap, and powered by Firebase.

PROFILE

An enthusiastic and diligent junior web developer who's keen on learning about up-to-the-minute technologies. I enjoy overcoming challenges and going above and beyond expectations. I seek to constantly improve my creativity and my technical skills to become a fully-qualified full-stack web developer.
