## WORK EXPERIENCE

### 2021 Fast Food Menu Website(Pending)

Frontend

- Created using HTML , CSS , JS and Bootstrap
- Includes a basic contact us form using AJAX

### 2021 Adore Decor, an e-commerce website(adoreluxdecare.com)

Full Stack

- Created using Wordpress, and Woocommerce
- Uses a highly customizable, woocommerce compatible theme, and fully optimized for SEO

### 2020 Azoya, an architecture website(not deployed yet, azoya.com)

Frontend

- Created using HTML , CSS , JS and UIKit
- Includes a basic contact us form using AJAX

### 2020 OpenHousesLebanon(openhouseslebanon.online)

Full Stack

V1

- Created using ReactJS and Material-UI, and leafletJS
- Fetches data from an API created using Laravel

V2

- Fully transitioned to Laravel, kept some endpoints serving JSON Data
- Kept the Map, using ReactJS and LeafletJS

### 2020 UL Info, a website used to distribute class materials between classmates(ul-info.rf.gd)

Full Stack

V1

- Created using HTML, CSS , UIKit, and a completely written in vanilla js script, responsible of calling the API, and handling UI changes
- CMS and API are both written in pure PHP

V2

- Switched entirely to Laravel
- Implemented the ability to watch online classes recordings in a very organized manner.

## SKILLS & EXPERTISE
