

GHINWA OMARI

ARCHITECT

ABOUT

A fresh graduate architect, seeking to get experience and learn more about the world of architectural engineering, as well as to build a wider professional career. During my work and educational experience I have acquired many different skills which include working with others, managing time and meeting deadlines. As an architect it is my goal to enhance my abilities to deliver high-quality designs and projects. Through my study and professional experiences I discovered that the field of architecture as well as art and graphic design are fields I am passionate about.
