# IN SHAPE

"IN SHAPE" Makes the body more beautiful; bring the body to peak physical condition; get stronger, become physically strong; get in good physical condition.

It is an application and website, whose main demand is to help all athletic people to stay and be in shape. This app consists of training sessions, nutrition, food schedule, and many more, etc ...

I have chosen the red color for this related to passion, motivation, working hard, etc... all those meaningful worlds for sports.

In this world (weightlifting) the components of Fitness are the cardiorespiratory health, strength (pull-push-press), power (apply force), agility/speed, joint flexibility, stamina/endurance, mobility, cognitive and mental health and many other things, all important parts of an optimized fitness program.

The app is about sports, Heavy, simple, ether progressive sports.

To be Fit and stay IN SHAPE.
