Key qualifications:

I am an integral part of the applications development team. I have experience in developing queries and reports as well as main functions in Project Management, Human Resources and the Contract Management & Engineering Package. I have recently contributed to the RockWise 5D project by developing and providing quality assurance for the Engineering Package and its interface with Autodesk Revit and Oracle Primavera.

I am the application specialist for the Rockwise Project Management (PMIS) for all World Bank funded projects at the Ministry of Education & Higher Education, Council for Development & Reconstruction, and Beirut Water Authority. I am responsible for resolving any end-user support issues, ensuring system integration and introducing enhancements and new functionality on all packages and modules. In addition, I am the first level of support for the Engineering package for clients in the construction, engineering and real estate sectors.
