Summary

A self-taught front-end developer, experienced in angular 2+, flutter and their most used libraries. Looking forward to learn new/needed technologies in the market. Started a training with a 20 years experienced instructor that taught me the core functioning of angular, and best design pattern for a backend (5 layers) using .Net Core and MSSQL

Skills

- Node.js
- Bootstrap
- HTML
- DART(flutter ~ native ANDOIRD and IOS)
- getx (flutter)
- express
- angular material
- GraphQL
- MSSQL
- TypeScript
- CSS
- highly efficient research
- npm
- Angular
- Git
- Python

Languages

- Arabic
- French
- English

Education

high-school

Collège Sainte-Thérèse • amioun, koora   08/2015

Experience

Developped an ecommerce mobile application that can be controlled via a backend admin (website),   07/2019 - 07/2021

Angularizing a template.

Practiced building many angular and flutter user interfaces.

Learning new libraries everyday

Have done all tutorials and practices of the listed technologies by the youtube channel "freecodecamp"

Hobbies

Reading, Swimming, working out, Skiing
