USLS

CERTIFICATIONS

Angular Front To Back May 2020
Udemy

Certificate of participation as a software developer August 2020
Kidzie

WORK EXPERIENCE

Ecomz

Junior Front-End Developer

(October 2020 - Present)

Worked on 'Smart Search' Feature using Angular 8 and AngularJS. This feature is handled from both admin and public sides and it increases sales and searchability for both the company and the customers: I was responsible for different tasks as listing the products following a submitted design flow.

Worked on 'Eich Loubnan' Feature. Enabled and initiated by the admin, users can benefit from discounts on their purchases: I enhanced the feature by maintaining the quality of the product and improving the UI/UX

Participated in the 'Theme Builder' Project, where users have the ability to create a store from scratch using different sections and customizing the store's sections from the left panel. my tasks involve creating and binding each section with the left panel following the design.

Currently enhancing the company's website using Webflow. My responsibilities include creating responsive pages such as the Home, Features, Services, and Setup pages, implementing specific designs such as sliders(implemented Owl Carousel Library).

Kidzie

Software Developer Trainee

(July 2020 - August 2020)

Attended a one-month intensive training program founded by Kidzie and Schema zone. Completed training remotely since the company is located in Toronto, Ontario, Canada

Participated in weekly lectures (on source control with Git, different development tools, requirement collection, effort estimation. Strategy debugging) & Building APIs using C# and Dotnet Framework

Task accomplished: Assisted in writing APIs for the ongoing project: worked on refund and retrieve APIs using C# and pushed them on Gitlab

Riyada for Social Innovation

Game Developer intern

(June 2019 - August 2019)

Mentored in "IOT for Good" summer camp held in BDD and helped the students in building and pitching their projects using raspberry pis and in writing simple and efficient python code Collected material for Virtual Reality (VR) via research and different online courses on Udemy Created "VR for Good" course that teaches the enrolled students how to create their first customized VR game in a three-day Summer Camp
