Address: West Bekaa, Lebanon

Summary

Lebanese / Brazilian

Postgraduate architecture student currently pursuing my masters degree at the Lebanese university.

Having worked alongside numerous architects, while conducting projects for personal clients during my years of schooling, I have a very strong architectural background and superb designing skills.

Determined to exceed expectations in what I truly excel.

Work History

INTERN ARCHITECT – Freelancing

January 2020 – Present

- Worked alongside the project manager of a residential compound project consisting of 22 villas and an estimated cost of 7 million \$ as an assistant.
- Worked closely with several local architects on architectural documents for the building permits in Lebanon
- Provided 3D modeling and rendering services for local architects
- Completed several residential projects as an architect assistant
- Advanced knowledge in construction, finishing work, and maintenance
- Successfully created my own client base and promoted my work on social media

WATERJET OPERATOR – Modern Housing

August 2019 – Present (part time)

- Created numerous designs for floor tiling
- Prepared all necessary drawings using AutoCad
- Operating the machine and executing the designs while monitoring the water pressure and sand quantity
- Choosing between different types of marble and ceramic tiles to integrate together
- Project pricing

INTERNSHIP – Eng. Deeb Sharanik Company

January 2019 – December 2019

- Working both independently and as part of a team
- Accurate and efficient project cost estimation
- Visiting construction sites and supervising the building process
- Handling and resolving all client complaints
- Drafting fully detailed working drawings for several projects
- 3D modeling and rendering the firm's projects
- Participating in the design process while exchanging opinions and experiences
