OBJECTIVE

Passionate, creative, fast-learning, analytical student-athlete with a strong tendency to learn new skills and hobbies. Looking forward to applying my enthusiasm and skills in order to solve difficult problems, overcome challenging tasks, and learn new concepts in a hands-on environment.

EXPERIENCE

Coding Instructor | Geek Express

JULY 2022 – PRESENT

Game development instructor for kids ages 10-13 using Lua scripting language and Roblox Studio.

Math/Physics Tutor | Private

APRIL 2022 – PRESENT

Private tutoring for high school students. Focus is on IGCSE/IB Math and Physics.

SKILLS

- Proficiency in Java, Python, C
- Game development (C#, Lua, Unity)
- SQL, R, and Microsoft Access
- Problem solving and Analysis
- Quick learner
- Confidence and Flexibility

PROJECTS

Python Trivia Game

Two-player game in which players must be the first to answer trivia questions correctly in order to move forward and beat the opponent to the finish line.

Java Wordle

Wordle game that can be played on the terminal with all the same features.

Microsoft Access Database System for School's Career Guidance Counseling

Design and implementation from scratch using Microsoft Access to assist with planning and managing information related to university applications for high school students.

The database included tables, forms, queries, and reports, allowing students to enter their information and interested university choices to apply to, as well as the university they committed to.
