WORK EXPERIENCE

Software Developer Intern at NavyBits

July. 2022 - Present

- Design, build, and maintain high performance, reusable, and reliable JavaScript code.
- Use ReactNative FrameWork to build applications for android and IOS.
- Fix the design of e-commerce applications according to clients' requests.
- Identify and communicate technical problems and solutions with the team.

- Integrate third-party APIs for Push Notification functionalities (OneSignal).
- Work closely with fellow developers, managers and designers.
- Using Git and GitHub to keep track of changes.

Flutter Developer Intern at ZeesWeb

Mar. 2022 - Jun.2022

- Used Flutter and Dart to build SociaBatt application (it's a network social platform that allows users to create limited-time online battles or debates).
- Ensured the best possible performance, quality and responsiveness of the application.
- Accessed data on android application by using MYSQL as a database at the webserver.
- used HTTP requests to fetch data from the database.
- Used Gitlab for tracking issues.

VOLUNTEER EXPERIENCE

Coordinator at MMKN Organization

Nov. 2021 - Jan. 2022

- Took attendance of assigned school from the academic volunteers and sent it in an excel format to MMKN's Program Coordinator.
- Rescheduled sessions in case of any academic volunteers' absences.
