

# Ali Hamad

## Frontend Developer

### Contact/Personal Information

- Phone number: +961-71715390
- Email: [ali.hamad@lau.edu](mailto:ali.hamad@lau.edu)
- Date of birth: 30-08-1996
- Nationality: Lebanese

### Education:

#### **B.S. in Computer Science**

**Lebanese American University (2017)**

- Had an internship at the IT department at LAU. (2016)
- Was a teaching and Lab assistant (2016-2017)

### Objective:

I've worked in different domains yet I always believed that software development is the field to which I belong. I'm a passionate junior frontend developer specialized in react. Experienced in building enterprise scale projects for different industries. Eager to use and expand his technical skills and vast experience as a frontend developer at your company.

### Work Experience:

#### **Full stack developer intern**

**Poyesis-FR Lebanon (April, May-2022)**

- Created React components from scratch as demanded in the design.
- Used various react hooks to handle components complexities.
- Wrote generic methods using typescript for reusability and abstraction.
- Integrated Axios REST methods in front end and Rest controllers for backend.
- Immersed in existing projects, understood existing code and workflow and continued with ongoing tasks.
- Used resources on the web to overcome problems and come out with solutions.
- Worked in an agile environment to deliver tasks periodically to clients.
- Utilized git efficiently for version control (branches, pull requests....)
- Troubleshooting, bug fixing, code refactoring, researching for complex tasks.

#### **Financial Operation Manager**

**Stallion, Lebanon (2018-2020)**

- Conserving all sales data.
- Presenting daily report regarding sales.
- Managing business and work flow with branch managers.

- Training new cashiers on both cash and system roles and functionalities.
- Reporting and fixing simple system bugs in collaboration with IT department.

### **Work Projects:**

- Poyesis Admin: a management tool for Poyesis in which I integrated functionalities that servers keeping track of employee information.
- ALB Admin: A Backoffice that manages delivery services.
- Rue de Goodies: E-commerce website management tool.

### **Software development skills:**

- HTML5, CSS3, SCSS, JavaScript, TypeScript.
- ReactJs, React- router.
- Rest API.
- AJAX, OOP, NPM.
- Version control: Git and GitHub.
- PDF and Excel files control with NodeJs
- Good knowledge in web design and UX.
- Background in Java and Python.

### **Soft Skills:**

- Efficient communication with team members.
- Time management in terms of scheduling based on priorities.
- Flexibility, target based.
- Desire to learn and explore new technologies.
- Logical thinking and problem solving.
- Respectfulness where a healthy work environment is a key of success.

### **Languages:**

Fluent in English and Arabic
