PROJECTS

Homemade — Made With Love

The user can either be a cook or a customer. Cooks can add menus and receive orders. Customers can view cooks located in their area, order items from their menus, and chat with them.

- **Frontend:** React.
- **Backend:** Node.js, Express, MongoDB, Socket.io (features include Google Maps, notifications, and live chat).

PROFILE

Competent in all aspects of software development and problem solving. Stickler for details and effective time management. I thrive under pressure.
