ABOUT ME

I'm an ex sales manager who loves building things with code.

It started back in 2015 when I was with my brother's friend and he was telling me about this thing called Python and how it could automate things. As a person who looks for efficiencies, I was hooked.

I jumped right into Python. Soon, I was automating my own things. Unfortunately, that is as far as it went. Shortly after, I got promoted and I had to travel so I had less time to learn and I let programming fall by the wayside.

But, then Covid hit and suddenly I had more time without my commute. So, I started learning again. Specifically, I learned web development, as I had things I wanted to build for myself.

After a few months of self-teaching, I knew this was what I wanted to do for my career. So, I signed up for the Re:Coded Bootcamp in collaboration with Flatiron school and put my heart and soul into it. I was coding every day, late into the night, and on weekends.

Since the bootcamp, I have grown as a developer, working alongside senior developers who have helped me raise my standards for what's expected of any web application.

I'm now seeking a full-time role where I can contribute my skills both in coding and business to help a company achieve their goals.

SKILLS

| | |
|---------------------|--|
| React JS | CSS / Sass / Styled Components |
| JavaScript, ES6 | HTML |
| C# .NET Core | Git / Github |
| Firebase | Figma / Adobe XD |
| MySQL / PostgreSQL | Bootstrap / Material UI / Tailwind CSS |
| Docker / Kubernetes | Microsoft SQL Server |
| Azure Cosmos DB | Agile / Scrum |

EDUCATION

Bachelor of Science

Arab Open University / 2019

Information and Computing Technologies.

Bootcamp

Re:Coded & Flariton School / 2021

Front End Web Development (HTML/CSS, JavaScript, React)
5 months of intensive learning per project + immersive coding, with a simulated client project

TECHNICAL PROJECT

Freelance Projects

UI design
Front end development
