

## Education

2020–2023 **Rafik Harriri University,**  
*Computer Science, Department of Arts and Sciences.*

## Experience

May 28, 2022 **Web Developer at BusMap.**

- Helped develop a website
- Back-end

### **Roles and Responsibilities.**

- Optimize application performance through profiling, testing, and tuning.
- Develop and maintain technical documentation, including code documentation, user manuals, and technical specifications.

## Projects

December 2022 **Cakyzana Using React and Firebase, .**

- Design and develop a responsive website.
- Implement user-friendly navigation, intuitive interfaces, and engaging visuals to enhance the user experience.
- Ensure website performance and scalability through appropriate coding practices, testing, and maintenance.
- Contribute to website strategy and planning by participating in team meetings and providing input based on technical expertise.

February 2023 **Mobile Application Using Android Studio, .**

- Develop and maintain a scalable and responsive mobile app using best practices and the latest mobile development technologies.
- Write clean, efficient, and maintainable code for the mobile app, while ensuring that it meets business requirements and specifications.
- Create and maintain mobile app documentation, including technical specifications, user manuals, and other materials as needed.
- Collaborate with other team members to develop, test, and deploy new features

## Certifications

2021 **Wordpress Workshop, .**

- A technical 2 day workshop.
- Shows how to set up a ready functioning website and how to utilize all features.
- Learn how to build and manage a website.

2022 **Cisco Certified Network Associate, .**

- A technical course that shows how to design, install, operate and maintain networks in businesses as well as enterprise and service provider environments.
- In-depth understanding of networking fundamentals: The CCNA course covers the foundational concepts of networking, including network protocols, LAN and WAN technologies, routing, switching, and network security.
- Expanded knowledge of Cisco technologies

2022 **Machine Learning Bootcamp, .**

- An intensive day-program that provides different machine learning applications.
- Practical, hands-on experience with real-world datasets, allowing participants to apply machine learning concepts in a practical setting.
- Structured learning environment that helps to stay on track and achieve learning goals.

## Skills

Languages Java, PHP, C++  
Frameworks React  
Scripting HTML/CSS, JavaScript

Databases MySQL, Firebase

Design Adobe XD

Extra Strong problem-solving and analytical skills, Excellent written and verbal communication skills

---

## Personal Details

Languages English, Arabic
