Work Experience

Semmelweis University, Biochemistry Teaching Assistant	02/21 – 06/21
• Prepared lecture presentations, created overall review and summaries for each lecture to be submitted to the Dean's office, assisted the professor in the lab setups and guiding students throughout the lab	

Projects

Analyzing the tourism and carrying capacity in Faraya	09/18 – 06/19
• Interviewed business owners in the touristic sector, met with deputy mayor of Faraya municipality back-then, created surveys and distributed them among people to fill them up, utilized mathematical and statistical methods to convey my hypothesis that Faraya has reached its environmental carrying capacity	
Use of mathematical probability in judicial court	09/18 – 06/19
• Used Benford's Law (the law of anomalous numbers) and the prosecutor's fallacy to acknowledge how these two laws can change the outcome of a court case or help indicate the outcome	
• Tested Benford's law on Apple's revenues throughout the years to conclude that our testing indicates either manipulation and fraud in the Apple's revenues or the need to open a case in court to study these mathematical results	
• Tested Prosecutor's law on DNA test's degree of error in a case of murder, only to conclude that an originally accused person who was 100% guilty with DNA evidence is now only 14% guilty as a result of the DNA margin of error matching between multiple of possible candidates	

Extracurricular Activities

Warwick Economic Summit Participant London, United Kingdom	02/22
• Participated in an international conference that welcomed inspirational speakers from different backgrounds to discuss wide and relevant issues in this century	
Semmelweis 250 Clinical Conference Participant Budapest, Hungary	09/10/20
